

Welcome to Northland EDU Education Opportunities

These courses provide you with a streamlined and efficient way to become recertified *if your license as a CNA or LNA has lapsed*, and you wish to become recertified in your state or you just want to *refresh your caregiving skills to build confidence* in your skill set.

After *approximately three weeks* you will be entitled to show your understanding of caregiving principles and display your abilities during an *online conversation and evaluation with an experienced CNA/LNA instructor*.

If you are in a qualifying state, you will be able to apply for re-licensure following successful completion of this online evaluation with your instructor.

You will be watching *how-to videos* on all the different caregiving skills which you can rewatch until you feel comfortable with performing all aspects of each skill. *Note packages* are also provided for you to review and study when you have available time.

Online classes are two hours in length and are scheduled in the evening, twice a week. Here you will get to know other experienced caregivers with expired licenses like yourself as well as caregivers just wishing to improve their skills.

Classes are *fun, engaging, and full of great caregiving stories and helpful tips and techniques*. During the online sessions you are encouraged to share your caregiving “gems” as well. *We all like to learn new ways to do things – that’s how we can help each other!* There is strength in numbers. We are all part of a great healthcare team and we all can learn when we share what we do!
